ORDER & RATIONALE

Mon

06:30	**Tissue assessment — FISH**	60min	your peak focus window
07:30	**Microscopy work**	60min	your peak focus window
08:30	**Microscopy work**	120min	your peak focus window
10:30	**Tissue assessment — FISH**	60min	your peak focus window
11:30	**Departmental meetings**	60min	moderate-focus slot
18:00	**Emails**	30min	low-focus slot — saves your peak hours for harder work
18:30	**Emails**	30min	low-focus slot — saves your peak hours for harder work
19:00	**Technical validation / lab support**	60min	moderate-focus slot

Tue

06:30	**Tissue assessment — FISH**	60min	your peak focus window
07:30	**Microscopy work**	60min	your peak focus window
08:30	**Microscopy work**	120min	your peak focus window
10:30	**Tissue assessment — FISH**	60min	your peak focus window
18:00	**Emails**	30min	low-focus slot — saves your peak hours for harder work
18:30	**Emails**	30min	low-focus slot — saves your peak hours for harder work
19:00	**Technical validation / lab support**	60min	moderate-focus slot

Wed

06:30	**Tissue assessment — FISH**	60min	your peak focus window
07:30	**Microscopy work**	60min	your peak focus window
08:30	**Microscopy work**	120min	your peak focus window
10:30	**Tissue assessment — FISH**	60min	your peak focus window
11:30	**Departmental meetings**	60min	moderate-focus slot
12:30	**Departmental meetings**	60min	moderate-focus slot
19:00	**Technical validation / lab support**	60min	moderate-focus slot

Thu

06:00	**Departmental meetings**	60min	moderate-focus slot
07:30	**Tissue assessment — FISH**	60min	your peak focus window
08:30	**Microscopy work**	120min	your peak focus window
10:30	**Tissue assessment — FISH**	60min	your peak focus window
18:00	**Emails**	30min	low-focus slot — saves your peak hours for harder work
18:30	**Emails**	30min	low-focus slot — saves your peak hours for harder work
19:00	**Technical validation / lab support**	60min	moderate-focus slot

Fri

06:00	**Departmental meetings**	60min	moderate-focus slot

07:30	**Microscopy work**	60min	your peak focus window
08:30	**Microscopy work**	120min	your peak focus window
17:00	**Emails**	60min	low-focus slot — saves your peak hours for harder work
18:00	**Emails**	30min	low-focus slot — saves your peak hours for harder work
18:30	**Emails**	30min	low-focus slot — saves your peak hours for harder work
19:00	**Technical validation / lab support**	60min	moderate-focus slot

EXAMPLE QUESTIONNAIRE RESPONSES

#	SUBSCALE	ITEM	RAW	SCORED
1	MA	Assuming normal circumstance, how easy do you find getting up in the morning?	5	
2	MA	How alert do you feel during the first half hour after having awakened in the morning?	5	
3	MA	How long a time does it usually take before you 'recover your senses' in the morning after rising from a night's sleep?	5	
4	MA	In general, how is your energy level in the morning?	5	
5	MA	I feel drowsy for a long time after awakening.	1	(rev → 5)
6	EV	I am more an evening than a morning active person.	1	
7	EV	I feel I can think the best in the evening.	1	
8	EV	If I were to study anything by myself, I would rather do it in the evening.	1	
9	EV	I am usually in an excellent mood in the evening.	1	
10	EV	In general, how is your energy level in the evening?	1	
11	DI	There are moments during the day where I feel unable to do anything.	3	
12	DI	There are moments during the day when it is harder for me to think.	3	
13	DI	My mood stays the same throughout the day.	3	(rev → 3)
14	DI	I can focus at any time of the day.	3	(rev → 3)
15	DI	At any time of the day, my motivation is the same.	3	(rev → 3)

Generated by PathoChrono. Scoring per Randler, Díaz-Morales, Rahafar & Vollmer (2016), *Chronobiology International* 33(7):832–848 (MESSi). Alertness model derived from Table 10 of the same paper. German norms (n=2096) per Vagos et al. 2019, *Front. Psychol.* Example responses are fictional; not real patient data.
